

Pre-Congress Workshop

Transport in Critically Ill (TRICI)

20 September 2018 (Thursday) | Academia, Level 2, L2-T1 | 8.30am - 5.00pm

Critical patients are moved constantly from location to location and their journey is fraught with complications. In fact, the movement has been thought to contribute to many errors and poor outcomes. This course is a one day compendium of simulation, refreshers and talks on the important aspects of moving critical patients from point A to B safely. The faculty has decades of medical retrieval experience and it is open to ALL fields of health care who are involved in moving patients.

Includes:

- Simulation
- Critical Care Refresher
- Equipment / Ambulance Demo
