# DISCOVER THE ENDOCRINOLOGY SENIOR RESIDENCY PROGRAMME

The SingHealth Endocrinology Medical Subspecialty Senior Residency programme aims to provide you with the advanced training and experience you need to become a consultant Endocrinologist.

You will be given the opportunity to diagnose and manage the full spectrum of patients with endocrine disorders. These include: diabetes mellitus, obesity, osteoporosis and disorders of the pituitary, thyroid, parathyroid, adrenal glands, gonads, and many more.

You will also get to participate in consultative activities on the inpatient services and be exposed to extensive outpatient experience in Endocrinology on the programme. We take great pride in selecting individuals who are good team players, motivated, diligent and dedicated to clinical excellence and patient care. If Endocrinology appeals to you, read on to find out more about our programme.

## YOUR LEARNING EXPERIENCE

of patients. The exposure to a wide spectrum of cases, including less common endocrine disorders, allows you to gain a broad clinical experience in Endocrinology.

### STRONG HISTORY IN ENDOCRINOLOGY TRAINING

The first endocrine unit in Singapore was set up in Singapore General Hospital (SGH), where it eventually developed into a full-fledged department. Many of Singapore's most prominent Endocrinologists were trained at this department, which continues to produce outstanding leaders and clinicians in the field of Endocrinology.

### DEPTH AND BREADTH OF CLINICAL EXPOSURE

As the nation's leading and largest healthcare cluster, SingHealth has one of the largest and most varied pool

### DEDICATED FACULTY AND STAFF

We have a dedicated pool of Faculty from various subspecialties in the field of Endocrinology to provide you with the comprehensive training you need in all aspects of the specialty. They are committed to medical education and passionate in training the next generation of Endocrinologists.

### ACCESS TO RESEARCH OPPORTUNITIES

We provide you various clinical, translational and basic science research opportunities, plus research mentoring, so you can develop your scientific skills to complement your clinical work.

- Obesity clinic
- Thyroid Fine Needle Aspiration clinic
- Osteoporosis clinic
- Transplant Endocrinology clinic
- Male Hypogonadism clinic

Other rotations include Paediatric Endocrinology, Reproductive Endocrinology, Nuclear Medicine and Biochemistry.

In addition, you will also get to participate in at least one research project during your training years to gain experience in translational and/or clinical investigation under the supervision of a research mentor.

## OUR CURRICULUM

The Endocrinology Medical Subspecialty Senior Residency programme at SingHealth is a structured three-year programme that will equip you with the medical knowledge, interpersonal skills, professional attitudes, and practical competence required to function as clinical Endocrinologists. The programme requires you to rotate through the two teaching hospitals, namely SGH and Changi General Hospital (CGH).

You will have the opportunity to diagnose and manage the full spectrum of patients with endocrine disorders. You will also be expected to rotate through subspecialty clinics including:

- Diabetes in Pregnancy clinic
- Young Adult Diabetes clinic

## YOUR CAREER PROSPECTS & DEVELOPMENT

The SingHealth Endocrinology Medical Subspecialty Senior Residency programme prepares you for an independent career in Clinical Endocrinology. Upon completion of the programme, you will be promoted to an Associate Consultant in one of the restructured hospitals.

You will be expected to conduct ambulatory clinics in the outpatient setting and run inpatient services as the consultant Endocrinologist, leading a team of Senior Residents, Residents and medical students in the ward rounds.

You can also expect to be involved in the teaching programme of your Department as Residents and medical students rotate through your department. You may also choose to pursue a research career in the field of Endocrinology.

## HEAR FROM OUR RESIDENTS

“

SingHealth Residency has given me the opportunity to manage an exciting variety of patients, guided by supportive and enthusiastic Faculty who are experts in their field. The well-structured programme and rotations to different subspecialty departments have equipped me with the skills required to manage a wide range of conditions, enabling me to make a difference in my patients' lives.

**DR AMANDA LAM**

Endocrinology Senior Residency Alumna, Year 2017

”

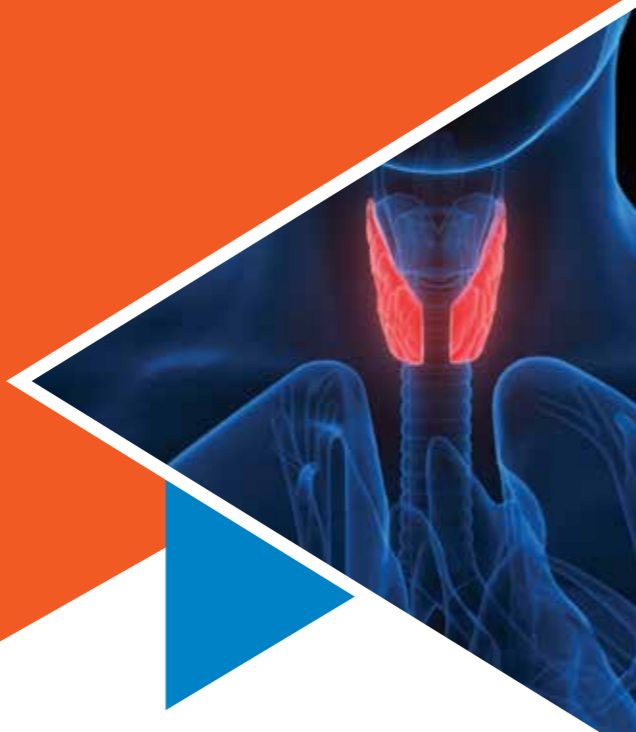

“

Endocrinology is a fascinating and meaningful medical specialty. I am privileged to have had the opportunity to train in the SingHealth Endocrinology Residency programme. Under the guidance of a nurturing and excellent Faculty, SingHealth is the best training ground for any budding endocrinologist.

**DR AMANDA LIM**

Endocrinology Senior Resident, Year 2018
