

SingHealth ENT Head & Neck | Instructional Course Fortnight 2024

10th Septorhinoplasty Course

Tuesday – Wednesday | 3 – 4 September 2024
Academia, Singapore General Hospital | Singapore

INTRODUCTION

Our long-running and regionally well-received septorhinoplasty instructional course returns with another highly-regarded team of international and local faculty.

This exciting and intensive 2-day program includes a comprehensive collection of lectures with daily hands-on dissection on high-quality cadavers at our state-of-the-art dissection lab.

The course focuses on both the cosmetic and functional aspects of septorhinoplasty, and will include septoplasty, dorsal augmentation, autologous cartilage harvest, and tip refinement techniques. Additional new techniques such as 3D-printed PCL implants and diced cartilage grafting will be available for participants to utilize in the lab.

COURSE OBJECTIVES

Upon completion of the course, the participants will be able to

1. Perform a comprehensive evaluation of functional and aesthetic nasal pathology
2. Formulate a surgical plan to address nasal valve pathology
3. Perform surgical maneuvers in nasal valve reconstruction, septoplasty, and cosmetic rhinoplasty.

PROGRAMME OVERVIEW

Both days of the course start in the mornings with lectures, followed by cadaveric dissection in the lab in the afternoons.

WHO SHOULD ATTEND

This course is designed for ENT, Plastic and Maxillofacial surgeons and residents who keen to expand their knowledge and surgical skill set in surgical septoplasty and rhinoplasty.
